

# CASE STUDY

Client: Swizzels Matlow  
End User: Swizzels Matlow  
Project: Condensate Recovery System  
Products: Arbe ACR5000 Condensate Recovery Package  
Date: April 2018

## Project Description

Arbe won an order for the design and supply of a condensate recovery package, one of our standard ACR units. The unit was installed and ran without any commissioning requirements, our ACR units are generally supplied factory set for plug-and-play operation

The unit has a stainless steel receiver, stainless steel pipework and integrated electrical controls along with the duty/standby pumps as the standard supply.

The ACR standard range of condensate recovery units offer solutions for duties up to 10,000 kg/hour and 4.5 BarG outlet pressure, with other flowrates and pressures also available.
